

Class - II

Important Note

The syllabus for class II has been divided into 3 cycles. The activity-based approach ensures that learning is an enjoyable experience. To help the children learn in a stress-free environment, no formal examination system is followed. Comprehensive and continuous evaluation system is adopted by administering brief tests during each cycle which are adjudged in grades. Extensive oral tests based on class response help the child to improve his/her listening and speaking skills. The children should be encouraged to be regular in work and to school. Promotion is based on a minimum of 75% attendance and satisfactory performance in all the 3 cycles and also on class response throughout the session.
